1. Ensure that you have access to a laptop or desktop with an appropriate configuration for running Android programs.

2. Install the following software on your PC or laptop. [64-bit operating system]
   Note: Following software are required for both regular lab sessions and practical examination.
   - Web Browser: Chrome (recommended), Mozilla Firefox
   - Java: Java Development Kit (JDK) – Java 17
   - IDE: Android Studio Bumblebee (android-studio-2021.1.1.14-windows)

Note: The above set of software are w.r.t. 64-bit Operating System. If the Student has 32-bit Operating System, then he/she can download the appropriate versions which are suitable for executing the lab programs.

3. Students are expected to have access to the offline tools mentioned above for conducting experiments.
