Ques 1

Algorithm

1. Scan input from user
2. Use switch case for checking the month
3. Print the month accordingly

```c
#include <stdio.h>
int main(){
    int month_number;
    printf("Enter the # of month");
    scanf("%d", &month_number);
    switch(month_number){
        case 1:
            printf("Jan"); break;
        case 2:
            printf("Feb"); break;
        case 3: printf("March"); break;
        case 4: printf("April"); break;
        case 5: printf("May"); break;
        case 6: printf("June"); break;
        case 7: printf("July"); break;
        case 8: printf("August"); break;
        case 9: printf("September"); break;
        case 10: printf("October"); break;
        case 11: printf("November"); break;
        case 12: printf("December"); break;
        default: printf("Invalid"); break;
    }
    return 0;
}
```
